& Floorcoverings

"POLYRIB" Chevron Ribbed Polypropylene Carpeting

Installation

Polyrib should ideally be fully adhered for best results when used as a wall to wall foyer carpeting. Single sections may be loose-laid in a matwell recess, but multiple sections should be fully bonded.

The subfloor must be smooth, dry, level and free from any contaminants. Any irregularities should be levelled using a standard flooring self-levelling screed.

Recommended adhesives are:

"F3" supplied by F. Ball & Co.

Or

"PU2000" Polyurethane Adhesive for external/wet areas. Supplied by Jaymart.

A carpet edging trim may be required to complete the installation if there is a variation in thickness between the Polyrib and the surrounding floorcovering.

Safety Flooring & Matting Systems

Entrance Matting Systems (Aluminium, Coir, Rubber Polypropylene, Nylon, etc.) & Matwell Frames.

Rubber Flooring Systems (Round Studded, Square Studded, Ribbed, Slate, Chequered, Hammer, Terrazzo, Smooth etc.)

Safety Stair Treads & Nosings

Sports Floorings
Specialist Floorings & Mattings
(Golf Spike Resistant, Ice Skate Resistant, Oil & Grease Resistant, Low Smoke Emission/Fire Resistant, Cigarette Burn Resistant, Anti-Static, etc.)

Interlocking Looselay Flooring Tiles & Mattings
